

Acknowledgements

This MOOC would not have been realised without the generous support and assistance of numerous people, and we would like to acknowledge them here.

We are particularly grateful to the volunteer translators, proof-reader and testers who provided significant assistance:

- The video captions were translated into Chinese by the [EduInfinity Translation Group](#) (教育无边界字幕组). A total of 24 volunteers contributed to the translations. Yiyun Shou initiated the translation of our MOOC, liaised with the Chinese translation team, and implemented the Chinese Glossaries.
- Susan Smithson proofread and edited the video captions during post-production.
- We are grateful for the constructive and helpful feedback from our testers. Individual lectures were reviewed by Stephen Chaffey, Yiyun Shou, Erin Walsh, Yevdokia Mashak, Luis Ordóñez, Jane Dixon, Timothy Dobbins, Eduardo Lopez, and Bianca Vienni. The course as a whole was tested by Jen Badham, Rochelle Christian, Nicky Grigg, Christine Laurence, and Dione Smith.

Professor Marnie Hughes-Warrington, Deputy Vice-Chancellor (Academic) at The Australian National University, provided funds for the course development. Dr Paul Francis, co-producer of the ANUx MOOC on astrophysics, gave us much-needed guidance and advice that helped us to evade many of the pitfalls that awaited us as first-time MOOC developers.

Jamie Kidston, Jack Fox, and Edwina Wright at the ANU SCAPA Studio produced consistently high-quality videos. Sue Jacobs and staff, of Type Transcripts, provided consistent high-quality transcripts. Kimberley Brady created the graphic design layout for the course syllabus.

Cathy Day helped revamp our course interface. Mark Rudnick, our edX contact, responded promptly and helpfully any time we encountered a puzzle in the edX platform that had us stumped.

The ANU Online and Strategic Communications and Public Affairs teams provided valuable support and resources for marketing and publicity.
