

## Online Courses App and Map

In the course we use the Online Courses App to gather input for three assignments:

In module 1 you will do the 'Diversity of Food Production Systems' assignment and an opinion poll.

In module 6 you will fill in an opinion poll again.

You can document the answers on these assignments via the Online Courses App. The results of fellow course members are visible via the Online courses map. You can find this map in the dashboard panel above. To discuss your results and those of your fellow course members, please use the course discussion forum.

### Installation iOS & Android

1. Open the Appstore
2. Search for WageningenX
3. Select WageningenX Online Courses App
4. Install the app
5. Give permission for location use
6. Open the app
7. Continue reading below: Registration Online Courses App
8. Desktop version

If you do not own a smartphone or experience a problem with the app, you can use the following link to upload your pictures and answers: <http://onlinecourses.wur.nl/desktop>. Don't forget to register as explained below.

**Note:** The desktop version of the app does not function well in Internet Explorer. Please use Google Chrome, Firefox or Safari instead. Also, because the app was developed for a touch screen, there is no scroll bar available in the desktop version. Instead, use the scroll wheel of your mouse or laptop touchpad. To delete your contribution, use your right mouse button and move to the left.

### Registration Online Courses App

Open the Online courses App

Register with the same e-mail address you use for your MOOC account

Log in with the e-mail address and the new password that you created for the app

Fill in the unlock code for your course STESm

Congratulations! You are now a user. Good luck with using the Online courses app!

As a first assignment make a picture of a food production system characteristic for the country you live in. Take a picture via the Online courses App and simply upload it. Then classify the production system shown in your picture based on a set of criteria by ticking one option per criterion only. Have a look at other students' set ups in the Online courses map in the dashboard panel above.

Please note: the Online Courses App uses and stores the following information:

- Your registration e-mail address and alias.
- Your location.
- The location information of any photos that you upload using the app.

The location information is necessary to display the graphics and photos in the Chart and Picture Maps.

Use of the Online Courses App is optional. Your location information is only shared if you choose to do the exercises in the app. If you don't want any of this information to be stored or displayed, simply skip the app exercises. This will in no way impact your grade.

Deleting any completed exercises will also delete that data from our database. If you wish to have your e-mail address removed from our database, please send an e-mail to [wageningen.x@wur.nl](mailto:wageningen.x@wur.nl).
