

Six-point plan for implementing generative AI in your organization

Instructions

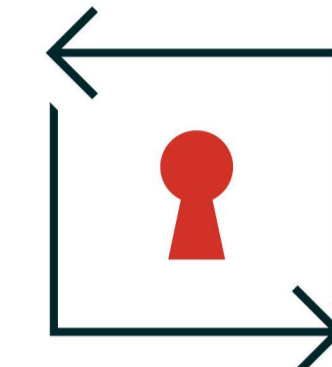

Describe how you could begin implementing generative AI in your organization using this step-by-step strategic plan. Identify the steps you would take, the challenges you might face, and how you would navigate them to ensure a successful implementation.

Step 1

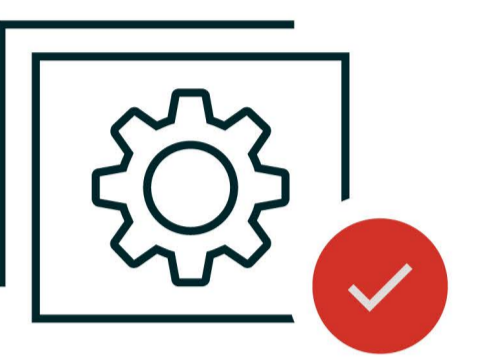

Define clear objectives, use cases, and budget.

Step 2

Assess data availability and quality.

Step 3

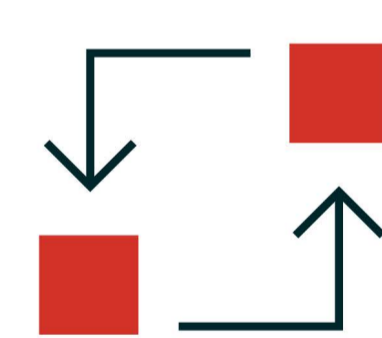

Select the right generative AI framework or solution.

Step 4

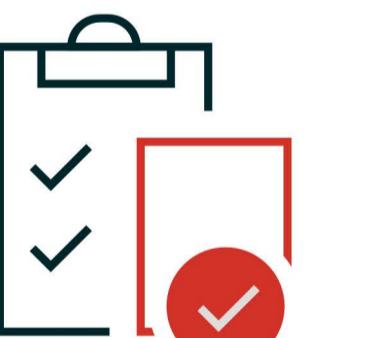

Build a cross-functional team and foster skills development.

Step 5

Pilot projects and iterative implementation.

Step 6

Monitor performance and ethical considerations.
